Striker Systems Introduces STRIKER CAD/CAM Release 2024

WHITE HOUSE, Tennessee, August 2, 2022 – Striker Systems, an industry leader in the development of sheet metal fabrication solutions, is pleased to announce the release of STRIKER CAD/CAM 2024. STRIKER CAD/CAM provides automated programming of CNC profile cutting and punching equipment, nesting, and business system integration.

At Striker Systems, our commitment to innovation drives us to continuously refine and expand our software offerings to meet your evolving needs. With STRIKER CAD/CAM Release 2024, we have taken a significant step forward in empowering your sheet metal fabrication processes with cutting-edge capabilities and user-friendly interfaces.

Key Features of STRIKER CAD/CAM Release 2024:

1. **AutoCAD 2024 Compatibility:** Striker Systems continues our commitment to provide full compatibility with AutoCAD, the world's leading 2D CAD platform. STRIKER CAD/CAM 2024 is built on the latest AutoCAD 2024 OEM platform, and FAB Professional and DIE Professional 2024 are fully compatible with AutoCAD 2024.
2. **Sheet Remnant Tracking:** Numerous advancements in sheet remnant creation and tracking improve material yield and streamline the use of sheet remnants on the shop floor.
3. **Analytical Tools for Punch Parts:** A new part/tool filtering system allows programmers to determine tool usage across the entire PARTshare library as well as identify potential tool conflicts before parts are even nested.
4. **Heat Dissipation Optimization:** Part optimization algorithms have been advanced to better assist with heat dissipation and stress relief.
5. **PART Costing:** Customers using the STRIKER Costing Assistant will now see support for punching operations in addition to profile cutting.
6. **WIRE EDM Support:** Striker's wire EDM programming software, SS-WIRE EDM, is now available as a stand-alone solution. As a module of STRIKER CAD/CAM 2024, SS-WIRE EDM no longer requires a separate license of AutoCAD.

Striker Systems VP of Sales, Mike Boggs, expressed excitement about the launch, stating, "The STRIKER CAD/CAM 2024 Release embodies our dedication to pushing the boundaries of technological innovation. This release represents a new era of precision and connectivity, allowing users to unleash their full potential in every endeavor."

The STRIKER CAD/CAM 2024 Release is now available. For more information about the STRIKER CAD/CAM 2024 Release, its features, and how to purchase, please visit StrikerSystems.com or email sales@strikersystems.com.
