

FOR IMMEDIATE RELEASE

Striker Systems Celebrates 40 Years of Innovation in Sheet Metal Manufacturing

WHITE HOUSE, TN – February 3, 2025 – Striker Systems, a leading provider of CAD/CAM and nesting software solutions for sheet metal fabrication, proudly announces its 40th anniversary in 2025. Since its founding in 1985, Striker Systems has been at the forefront of innovation, helping manufacturers streamline operations and maximize efficiency with industry-leading technology.

From its early days developing one of the first PC-based CAD/CAM software solutions for sheet metal fabrication, Striker Systems has continually evolved to meet the changing needs of the industry. A key milestone in the company's history was its pioneering work in automatic nesting technology, significantly reducing material waste and improving production efficiency. This breakthrough helped establish Striker Systems as a trusted name in sheet metal manufacturing and solidified its reputation for driving technological advancements.

"For four decades, Striker Systems has been dedicated to helping fabricators maximize productivity and stay ahead in a competitive industry," said Danielle Lindsey, Marketing Manager of Striker Systems. "We take great pride in our history, but even more in the relationships we've built with our customers. As we celebrate this milestone, we remain focused on delivering the next generation of advanced software solutions for the sheet metal industry."

As part of its anniversary celebration, Striker Systems will be celebrating with special events throughout the year, including FABTECH 2025.
